SUBJECT INDEX

VOLUME 12 (1971)

- Acriflavine, in yeast, 235
 Adenovirus, type 5, differential susceptibility of two cell types, 191
Allium proliferum, caffeine and 8-ethoxy-caffeine at different treatment temperatures, 463
 2-Aminopurine, in bacteriophage T4, 1
 —, in *N. crassa*, 129
 4-Aminoquinoline, in bacteriophage T4, 1
 4-Aminoquinoline 1-oxide, in bacteriophage T4, 1
 Antibiotics, antibacterial, induction of cytoplasmic petite mutation, 357
Antirrhinum majus, association of highly mutable genes involving pigmentation, 381
Arabidopsis thaliana, action of nitrosamines, 65
Aspergillus nidulans, near UV light plus 8-methoxypsoralen, 29
 7-Azatriptophan, in *Ustilago maydis*, 349
Bacillus megaterium, streptomycin resistance in, 315
 Bacteria, UV-damaged, DNA replication, 121
 Bacteriophage, λ , particles, photodynamic inactivation of, with methylated proflavine, 9
 —, Φ X174, genetic expression in whole cells of heterozygous replicative-form molecules, 206
 —, T4, mutagenesis by 4-nitroquinoline 1-oxide, 1
Bacterium paracoli, comparison with mutant 170, 15
 Barley, modification of mutagenic efficiency of ethyl methanesulphonate, 331
 —, ratio of chemically induced chromosome aberrations to gene mutations, 397
 —, seeds, stored *N*-methyl-*N*-nitrosourea-treated, moisture content of, 391
 Benzylmethylnitrosamine, in *A. thaliana*, 65
 Bone marrow, cells, of mammals, trenimon-induced damage in, evaluated by micronucleus test, 417
 —, —, of rat, rubidomycin in, 91
 5-Bromodeoxyuridine, in bacteriophage T4, 1
 —, failure of alkylated HEp.2 cells to replicate newly synthesized DNA, 427
 —, sensitization to UV-induced mutability in *hcr* strains of *E. coli*, 105
 5-Bromouracil, sensitization to UV-induced mutability in *hcr* strains of *E. coli*, 105
 Bromouracil deoxyriboside, repair of alkylation damage in xeroderma pigmentosum cells, 453
 Butylmethylnitrosamine, *n*- and *tert*-, in *A. thaliana*, 65
 Caffeine, continuous exposure of HeLa cell, 197
 —, effect on mutation induction in Chinese hamster cells by UV light, 337
 —, potentiation of lethal action of alkylating agents on L-cells, 101
 —, and treatment temperature, 463
 Calf, thymus nucleohistone, cross-linking by nitrous acid, 113
 Canavanine, in *Ustilago maydis*, 349
 L-Canavanine sulphate, in modification of mutagenic efficiency of ethyl methanesulphonate, 331
 Carcinogen, 4-nitroquinoline 1-oxide, in bacteriophage T4, 1
 L-Cell, of mouse, caffeine potentiation of lethal action of alkylating agents on, 101
 Chloramphenicol, petite mutation in yeast, 357
 Chlorophyll mutation, in *Oryza sativa*, by deuterium oxide, 109
 Chromosome, X, nondisjunction and loss, in *D. melanogaster* by X-irradiation, 321
 —, X-Y interchanges, mitomycin C in *D. melanogaster*, 255
 —, Y, of *D. melanogaster*, X-ray-induced double mosaics, 100
 Cycloheximide, petite mutation in yeast, 357
 Cyclohexylamine, in mouse, 472
 Daunomycin, in human leukocytes, 441
 Decay, ^{32}P , effect of UV irradiation and, on thymineless death in *E. coli*, 341
 Deferoxamine, absence of chromosome aberrations in cultured human leukocytes treated by, 214
 Dehydration, effects of, on sensitivity of yeast to UV light, 365
 Deuterium oxide, chlorophyll mutation in *Oryza sativa*, 109
 Diepoxybutane, in *A. nidulans*, 29
 Diethylnitrosamine, in *A. thaliana*, 65
 Diethyl sulphate, in *A. nidulans*, 29
 —, in *V. faba*, 249
 Dimethylmyleran, caffeine potentiation of lethal action of, on mouse L-cells, 101
 Dimethylnitrosamine, in *A. thaliana*, 65
 Dimethyl sulphate, in *H. influenzae*, 21
 Double mosaics, X-ray-induced, involving Y-chromosome in *D. melanogaster*, 100
Drosophila melanogaster, action of mitomycin C, 255, 269

- Drosophila melanogaster*, (continued)
 —, ethylnitrosourea in, 159
 —, interaction of chromosome breaks, 211
 —, X-irradiation in oocytes, 321
 —, Y-chromosome, X-ray-induced double mosaics, 100
- Epithelial cell, of human foetus, susceptibility to adenovirus type 5, 191
- Erythromycin, petite mutation in yeast, 357
- Escherichia coli*, effect of UV irradiation and ^{32}P decay on thymineless death, 341
 —, *hcr* strains, 5-bromouracil sensitization to UV-irradiation, 105
 —, UV-damaged, DNA replication, 121
- Ethidium bromide, in modification of mutagenic efficiency of ethyl methanesulphonate, 331
- Ethionine, in *Ustilago maydis*, 349
- 8-Ethoxycaffeine, and treatment temperature, 463
- Ethyl methanesulphonate, in barley, 397
 —, chlorophyll mutation in *Oryza sativa*, 109
 —, in *D. melanogaster*, 269
 —, in *H. influenzae*, 21
 —, modification of mutagenic efficiency in barley, 331
 —, in *N. crassa*, 35, 129
 —, in *N. crassa* mutant *ad-3B*, 47
 —, in Sh_1 protein of maize, 151
 —, stored, moisture content of treated barley seeds, 391
 —, in *V. faba*, 71
- Ethylnitrosourea, in *D. melanogaster*, 159
- Ethylvinylnitrosamine, in *A. thaliana*, 65
- Fibroblast cell, of human foetus, susceptibility to adenovirus type 5, 191
- 5-Fluorodeoxyuridine, failure of alkylated HEP.2 cells to replicate newly synthesized DNA, 427
- p*-Fluorophenylalanine, in *Ustilago maydis*, 349
- 5-Fluorouracil, in *Ustilago maydis*, 349
- Fluorouracil deoxyriboside, repair of alkylation damage in xeroderma pigmentosum cells, 453
- Foetus, human, adenovirus 5 in two cell lines, 191
- Guinea pig, trenimon-induced damage, evaluated by micronucleus test, 417
- Haemophilus influenzae*, monofunctional methylating agents in strains defective in repair processes, 21
- Hamster, Chinese, caffeine and 8-ethoxycaffeine at different treatment temperatures, 463
 —, —, effect of caffeine on mutation induction by UV light, 337
 —, —, trenimon-induced damage, evaluated by micronucleus test, 417
 —, Syrian, trenimon-induced damage, evaluated by micronucleus test, 417
- HeLa cell, continuous exposure to caffeine, 197
- HEP.2 cells, alkylated, failure to replicate newly synthesized DNA, 427
- Heterozygotes, fitness of, of deleterious recessive mutations in the mouse, 281
- Homoarginine, in *Ustilago maydis*, 349
- Hordeum vulgare*, modification of mutagenic efficiency of ethyl methanesulphonate, 331
 —, ratio of chemically induced chromosome aberrations to gene mutations, 397
 —, seeds, stored *N*-methyl-*N*-nitrosourea-treated, moisture content of, 391
- Host-mediated assay, mutagenicity of *N*-nitrosomorpholine, 469
- Human, blood, exposure of HeLa cells to caffeine, 197
 —, cells, repair of alkylation damage in xeroderma pigmentosum, 453
 —, foetus, adenovirus type 5 in two cell lines, 191
 —, leukocytes, aberrations by daunomycin, 441
 —, —, cultured, treated with metal chelators, absence of chromosome aberrations, 214
 —, radiation-induced chromosome aberrations, 305
- Hydroxylamine, in bacteriophage T4, 1
 —, in *N. crassa*, 35
 —, in *N. crassa* mutant *ad-3B*, 47
 —, in *N. crassa* mutants, 57
- 4-Hydroxylaminoquinoline 1-oxide, in bacteriophage T4, 1
- Hypermutability model, test of, in *S. typhimurium trpA47S*, 204
- ICR-170, in *A. nidulans*, 29
 —, in *N. crassa* mutant *ad-3B*, 47
 —, in *N. crassa* mutants, 57
- Iodoacetamide, in modification of mutagenic efficiency of ethyl methanesulphonate, 331
- Irradiation, γ , in *A. nidulans*, 29
 —, γ and X, in mouse spermatogonia, 411
 —, far UV light, in *A. nidulans*, 29
 —, fast neutron, evidence against a cytogenetically resistant spermatogonial population in mice, 219
 —, —, genetic risks in mice, 291
 —, influence of selection, non-uniform cell population and repair on dose-effect curves of genetic effects, 175
 —, ionizing, genetic risks from, 291
 —, near UV light, plus 8-methoxypsoralen, in *A. nidulans*, 29
 —, UV, allelism tests of yeast mutants affecting sensitivity to, 328
 —, —, 5-bromouracil sensitization to, in *hcr* strains of *E. coli*, 105
 —, —, DNA replication in bacteria, 121
 —, —, effect of, and ^{32}P decay on thymineless death in *E. coli*, 341
 —, —, effect of caffeine on mutation induction in Chinese hamster cells, 337
 —, —, effect of dehydration on sensitivity of yeast to, 365
 —, —, induced mutant *ad-3B* in *N. crassa*, 47
 —, —, in mouse cells, caffeine potentiation of lethal action of, 101

Irradiation, UV, (*continued*)

- , —, in *N. crassa* mutants, 57
- , —, with or without photoreactivation, in *N. crassa*, differential photoreversibility, 221
- , —, sensitive human cells, repair of alkylation damage, 453
- , —, in *S. pombe*, 143
- , visible light, photodynamic inactivation of λ bacteriophage particles, with methylated proflavine, 9
- , X, in barley, 397
- , —, in *D. melanogaster*, double mosaics in Y-chromosome, 100
- , —, fitness of heterozygotes of deleterious recessive mutations in the mouse, 281
- , —, genetic risks in mice, 291
- , —, interaction of chromosome breaks in *D. melanogaster*, 211
- , —, to mouse spermatogonia, lifetime reproductive capacity in offspring, 81
- , —, in oocytes of *D. melanogaster*, temporal distribution, 321
- , —, in *V. faba*, visualization of gaps by staining of chromosomal proteins, 97
- , X, γ and ^{137}Cs , human chromosome aberrations, 305
- , X and UV, in *N. crassa*, 129

Leukocytes, human, aberrations by

- daunomycin, 441
- , —, cultured, treated with metal chelators, absence of chromosome aberrations, 214

Maize, ethyl methanesulphonate in Sh₁ protein, 151Mammals, cell cultures, effects of *N*-methyl-*N'*-nitro-*N*-nitrosoguanidine and streptozotocin, 183Mesodiepoxybutane, in *N. crassa*, 129

Metal chelators, absence of chromosome aberrations in cultured human leukocytes treated by, 214

8-Methoxypsoralen, plus near UV light, in *A. nidulans*, 29Methylated proflavine, photodynamic inactivation of λ bacteriophage particles, 9

Methyl methanesulphonate, caffeine potentiation of lethal action of, on mouse L-cells, 101

—, failure of treated HEP.2 cells to replicate newly synthesized DNA, 427

—, in *H. influenzae*, 21

—, in xeroderma pigmentosum cells, 453

N-Methyl-*N'*-nitro-*N*-nitrosoguanidine, in *A. nidulans*, 29

—, caffeine potentiation of lethal action of, on mouse L-cells, 101

—, effect on mammalian cell cultures, 183

—, in *H. influenzae*, 21

—, in xeroderma pigmentosum cells, 453

N-Methyl-*N*-nitrosourea, caffeine potentiation of lethal action of, on mouse L-cells, 101

—, stored, moisture content of treated barley seeds, 391

Methylphenylnitrosamine, in *A. thaliana*, 65

Microbial assay, for detecting chemical

mutagens in tissue homogenates, 335

Mitomycin C, in *D. melanogaster*, 255, 269Moisture, content, of stored *N*-methyl-*N*-nitrosourea-treated barley seeds, 391

Monkey, rhesus, trenimon-induced damage, evaluated by micronucleus test, 417

Monofunctional methylating agents, in strains of *H. influenzae* defective in repair processes, 21

Morpholine, in host-mediated assay, 469

Mouse, L-cells, caffeine potentiation of lethal action of alkylating agents on, 101

—, cyclohexylamine tests, 472

—, evidence against a cytogenetically radio-resistant spermatogonial population, 219

—, fitness of heterozygotes of deleterious recessive mutations, 281

—, genetic risks from ionizing irradiation, 291

—, a microbial assay for detecting chemical mutagens in tissue homogenates from, 335

—, mutagenicity of *N*-nitrosomorpholine in host-mediated assay, 469—, spermatogonia, acute γ -irradiation, 411

—, spontaneous somatic reversion, 171

—, trenimon-induced damage, evaluated by micronucleus test, 417

—, X-irradiated, lifetime reproductive capacity in offspring, 81

Mutagen, acriflavine, in yeast, 235

—, adenovirus type 5, differential susceptibility of two cell types, 191

—, 2-aminopurine, in bacteriophage T4, 1

—, —, in *N. crassa*, 129

—, 4-aminoquinoline, in bacteriophage T4, 1

—, 4-aminoquinoline 1-oxide, in bacteriophage T4, 1

—, 7-azatryptophan, in *Ustilago maydis*, 349—, benzylmethylnitrosamine, in *A. thaliana*, 65

—, 5-bromodeoxyuridine, in bacteriophage T4, 1

—, —, failure of alkylated HEP.2 cells to replicate newly synthesized DNA, 427

—, —, sensitization to UV-induced mutability in *hcr* strains of *E. coli*, 105—, 5-bromouracil, sensitization to UV-induced mutability in *hor* strains of *E. coli*, 105

—, bromouracil deoxyriboside, repair of alkylation damage in xeroderma pigmentosum cells, 453

—, *n*- and *tert*-butylmethylnitrosamine, in *A. thaliana*, 65

—, caffeine, continuous exposure of HeLa cell, 197

—, —, effect on mutation induction in Chinese hamster cells by UV light, 337

—, —, potentiation of lethal action of alkylating agents on L-cells, 101

—, —, and treatment temperature, 463

—, canavanine, in *Ustilago maydis*, 349

—, chloramphenicol, petite mutation in yeast, 357

—, cycloheximide, petite mutation in yeast, 357

—, cyclohexylamine, in mouse, 472

Mutagen, (*continued*)

- , daunomycin, in human leukocytes, 441
- , deferoxamine, absence of chromosome aberrations in cultured human leukocytes treated by, 214
- , deuterium oxide, chlorophyll mutation in *Oryza sativa*, 109
- , diepoxybutane, in *A. nidulans*, 29
- , diethylnitrosamine, in *A. thaliana*, 65
- , diethyl sulphate, in *A. nidulans*, 29
- , —, in *V. faba*, 249
- , dimethylmyleran, caffeine potentiation of lethal action of, on mouse L-cells, 101
- , dimethylnitrosamine, in *A. thaliana*, 65
- , dimethyl sulphate, in *H. influenzae*, 21
- , erythromycin, petite mutation in yeast, 357
- , ethionine, in *Ustilago maydis*, 349
- , 8-ethoxycaffeine, and treatment temperature, 463
- , ethyl methanesulphonate, in barley, 397
- , —, chlorophyll mutation in *Oryza sativa*, 109
- , —, in *D. melanogaster*, 269
- , —, in *H. influenzae*, 21
- , —, modification of mutagenic efficiency in barley, 331
- , —, in *N. crassa*, 35, 129
- , —, in *N. crassa* mutant *ad-3B*, 47
- , —, in *Sh₁* protein of maize, 151
- , —, stored, moisture content of treated barley seeds, 391
- , —, in *V. faba*, 71
- , ethylnitrosourea, in *D. melanogaster*, 159
- , ethylvinyl nitrosamine, in *A. thaliana*, 65
- , 5-fluorodeoxyuridine, failure of alkylated HEP.2 cells to replicate newly synthesized DNA, 427
- , *p*-fluorophenylalanine, in *Ustilago maydis*, 349
- , 5-fluorouracil, in *Ustilago maydis*, 349
- , fluorouracil deoxyriboside, repair of alkylation damage in xeroderma pigmentosum cells, 453
- , homoarginine, in *Ustilago maydis*, 349
- , hydroxylamine in bacteriophage T4, 1
- , —, in *N. crassa*, 35
- , —, in *N. crassa* mutant *ad-3B*, 47
- , —, in *N. crassa* mutants, 57
- , 4-hydroxylaminoquinoline 1-oxide, in bacteriophage T4, 1
- , ICR-170, in *A. nidulans*, 29
- , —, in *N. crassa* mutant *ad-3B*, 47
- , —, in *N. crassa* mutants, 57
- , mesodiepoxybutane, in *N. crassa*, 129
- , 8-methoxypsoralen, plus near UV light, in *A. nidulans*, 29
- , methylated proflavine, photodynamic inactivation of λ bacteriophage particles, 9
- , methyl methanesulphonate, caffeine potentiation of lethal action of, on mouse L-cells, 101
- , —, failure of treated HEP.2 cells to replicate newly synthesized DNA, 427
- , —, in *H. influenzae*, 21
- , —, in xeroderma pigmentosum cells, 453

Mutagen, (*continued*)

- , *N*-methyl-*N'*-nitro-*N*-nitrosoguanidine, in *A. nidulans*, 29
- , —, caffeine potentiation of lethal action of, on mouse L-cells, 101
- , —, effect on mammalian cell cultures, 183
- , —, in *H. influenzae*, 21
- , —, in xeroderma pigmentosum cells, 453
- , *N*-methyl-*N*-nitrosourea, caffeine potentiation of lethal action of, on mouse L-cells, 101
- , —, stored, moisture content of treated barley seeds, 391
- , methylphenylnitrosamine, in *A. thaliana*, 65
- , mitomycin C, in *D. melanogaster*, 255, 269
- , morpholine, in host-mediated assay, 469
- , 4-nitroquinoline 1-oxide, in bacteriophage T4, 1
- , nitrosamines, in *A. thaliana*, 65
- , nitrosomethylurea, in barley, 397
- , *N*-nitrosomorpholine, in host-mediated assay, 469
- , nitrous acid, in *A. nidulans*, 29
- , —, cross-linking of nucleohistone, 113
- , —, in *N. crassa*, 35, 129
- , —, in *N. crassa* mutant *ad-3B*, 47
- , —, in *N. crassa* mutants, 57
- , —, in *S. pombe*, 143
- , norleucine, in *Ustilago maydis*, 349
- , penicillamine, absence of chromosome aberrations in cultured human leukocytes treated by, 214
- , proflavine, in bacteriophage T4, 1
- , rubidomycin, cytogenetic effect *in vivo* in rat, 91
- , streptomycin, in *B. megaterium*, 315
- , streptozotocin, effects on mammalian cell cultures, 183
- , —, a microbial assay for detection of, in tissue homogenates, 335
- , sulphur mustard, caffeine potentiation of lethal action of, on mouse L-cells, 101
- , tetracycline, petite mutation in yeast, 357
- , β -2-thienylalanine, in *Ustilago maydis*, 349
- , trenimon, in cells of mammals, evaluated by micronucleus test, 417
- Mutant, *ad-3*, hydroxylamine-induced in *N. crassa*, 35
- , *ad-3B*, UV-induced in *N. crassa*, 47
- , petite, cytoplasmic, induced by antibacterial antibiotics, 357
- , *pyr-3*, in *N. crassa*, induced reversion, 57
- , 170, of *B. paracoli*, comparison with *B. paracoli*, 15
- Neurospora crassa*, differential photoreversibility of UV-induced premutational lesions, 221
- , hydroxylamine-induced *ad-3* mutant, 35
- , mutagen specificity, 129
- , mutant *pyr-3*, induced reversion, 57
- , UV-induced *ad-3B* mutant, 47
- Nitrogen sources, affecting mutation induction of acriflavine in yeast, 235

- 4-Nitroquinoline 1-oxide, in bacteriophage T4, 1
- Nitrosamines, in *A. thaliana*, 65
- Nitrosomethylurea, in barley, 397
- N-Nitrosomorpholine, in host-mediated assay, 469
- Nitrous acid, in *A. nidulans*, 29
- , cross-linking of nucleohistone, 113
- , in *N. crassa*, 35, 129
- , in *N. crassa* mutant *ad-3B*, 47
- , in *N. crassa* mutants, 57
- , in *S. pombe*, 143
- Nomenclature, of mutants affecting sensitivity to radiation in yeast, 328
- Norleucine, in *Ustilago maydis*, 349
- Nucleohistone, calf thymus, cross-linking by nitrous acid, 113
- Oocytes, *D. melanogaster*, X-irradiation in, 321
- Oryza sativa*, chlorophyll mutation by deuterium oxide, 109
- Penicillamine, absence of chromosome aberrations in cultured human leukocytes treated by, 214
- Photodynamic inactivation, of λ bacteriophage particles with methylated proflavine, 9
- Photoreversibility, differential, of UV-induced premutational lesions in *N. crassa*, 221
- Pigmentation, in *Antirrhinum majus*, association of highly mutable genes, 381
- Proflavine, in bacteriophage T4, 1
- , methylated, photodynamic inactivation of λ bacteriophage particles, 9
- Protein, Sh₁, of maize, ethyl methane-sulphonate in, 151
- Rat, trenimon-induced damage, evaluated by micronucleus test, 417
- , Wistar, cytogenetic effect of rubidomycin *in vivo*, 91
- Rubidomycin, cytogenetic effect *in vivo* in rat, 91
- Saccharomyces cerevisiae*, allelism tests of mutants affecting sensitivity to radiation, 328
- , cytoplasmic petite mutation induced by antibacterial antibiotics, 357
- , effects of dehydration on sensitivity to UV light, 365
- Saccharomyces ellipsoideus*, action of acriflavine, 235
- Salmonella typhimurium*, a microbial assay for detecting chemical mutagens in tissue homogenates from mice, 335
- , mutagenicity of N-nitrosomorpholine in host-mediated assay, 469
- , *trpA47S*, test of a hypermutability model in, 204
- Schizosaccharomyces pombe*, mosaicism and lethal sectoring in G1 cells, 143
- Spermatid, of *D. melanogaster*, interaction of chromosome breaks, 211
- Spermatocyte, of *D. melanogaster*, interaction of chromosome breaks, 211
- Spermatogonia, mouse, acute γ -irradiation, 411
- , —, evidence against a cytogenetically radioresistant population, 219
- , —, genetic risks from ionizing irradiation, 291
- , —, X-irradiation, lifetime reproductive capacity in offspring, 81
- Spontaneous somatic reversion, in mouse, 171
- Staining procedures of chromosomal proteins, for visualization of X-ray-induced gaps in *V. faba*, 97
- Streptomycin, in *B. megaterium*, 315
- Streptozotocin, effects on mammalian cell cultures, 183
- , a microbial assay for detection of, in tissue homogenates, 335
- Sulphur mustard, caffeine potentiation of lethal action of, on mouse L-cells, 101
- Temperature of treatment, of caffeine and 8-ethoxycaffeine, 463
- Test, allelism, of yeast mutants affecting sensitivity to radiation, 328
- , micronucleus, evaluation of trenimon-induced damage in cells of mammals, 417
- Tetracycline, petite mutation in yeast, 357
- β -2-Thienylalanine, in *Ustilago maydis*, 349
- Thymidine, tritiated, and diethyl sulphate, in *V. faba*, 249
- Thymineless death, in *E. coli*, effect of UV irradiation and ³²P decay on, 341
- Tissue homogenates, a microbial assay for detecting chemical mutagens in, 335
- Trenimon, in cells of mammals, evaluated by micronucleus test, 417
- Ustilago maydis*, fluorouracil and amino acid analogues, 349
- Vicia faba*, action of diethyl sulphate, 249
- , caffeine and 8-ethoxycaffeine at different treatment temperatures, 463
- , ethyl methanesulphonate-induced alkylation, 71
- , X-irradiated, visualization of gaps by staining of chromosomal proteins, 97
- Xeroderma pigmentosum, cells, human, repair of alkylation damage, 453
- Yeast, action of acriflavine, 235
- , allelism tests of mutants affecting sensitivity to radiation, 328
- , cytoplasmic petite mutation induced by antibacterial antibiotics, 357
- , effects of dehydration on sensitivity to UV light, 365
